

Student Health and Wellbeing Survey 2017

Information for School IT Manager

Your school is a member of the School Health Research Network and is taking part in an electronic student health survey in the autumn term.

It is important that you are aware of the survey's specifications and features in case there are any potential compatibility issues with your school's IT system.

- The survey is designed to be completed on PC/Mac or tablet device.
- Access to the questionnaire will be via a web browser. Any modern browser is supported (IE9-11, Firefox, Chrome, Safari, etc.). Please note that IE8 is not supported.
- The survey link uses the SSL protocol, so it will start with https://
- The survey uses JavaScript to enhance the user experience and it is strongly recommended that JavaScript is enabled on the PCs and tablets used to access the survey.
- Before you start the survey, we recommend that you whitelist the domain **"*.ipsosinteractive.com"** (including the *). **Any information required to allow access through local school or Local Authority firewalls should be identified and supplied to Ipsos MORI as soon as possible.**

If you have any technical queries regarding the survey, please contact Ipsos MORI at shrn@ipsos.com

A test link to the survey will be sent to the school in September. Please ensure you open this link to check it works before your school starts the survey.
