

Correction notice for the report of the 2019/20 School Health Research Network Student Health and Wellbeing Survey

Details

Incorrect percentages were reported in Tables 3.1-3.3 for the *% who felt lonely at least some of the time during last summer holidays.*

Comments

In the original version of the report, percentages reported in Tables 3.1-3.3 reflected the proportion of 11-16 year olds who *never or rarely* felt lonely during the last summer holidays, rather than the proportion who felt lonely *at least some of the time* during the last summer holidays (as reported in Figures 3.13-3.16). The percentages reported in Tables 3.1-3.3 were therefore notably higher than those reported in Figures 3.13-3.16. This error has since been amended.
